Energy performance certificate (EPC)

66b, Wolfington Road LONDON SE27 0RQ Energy rating

Valid until: 15 October 2028

Certificate number: 8018-6920-9929-0478-9902

Property type Top-floor flat

Total floor area 79 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for <u>landlords</u> on the <u>regulations</u> and <u>exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be C.

<u>See how to improve this property's energy performance.</u>

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating	
Wall	Solid brick, as built, no insulation (assumed)	Very poor	
Roof	Pitched, no insulation	Very poor	
Window	Fully double glazed	Average	
Main heating	Boiler and radiators, mains gas	Good	
Main heating control	Programmer, room thermostat and TRVs	Good	
Hot water	From main system	Good	
Lighting	Low energy lighting in 88% of fixed outlets	Very good	
Floor	(another dwelling below)	N/A	
Secondary heating	None	N/A	

Primary energy use

The primary energy use for this property per year is 307 kilowatt hours per square metre (kWh/m2).

Environmental impact of this property		This property produces	4.3 tonnes of CO2
This property's current environmental impact rating is E. It has the potential to be C.		This property's potential production	1.6 tonnes of CO2
Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.		By making the <u>recommend</u> could reduce this property's 2.7 tonnes per year. This wenvironment.	s CO2 emissions by
Properties with an A rating than G rated properties.	oroduce less CO2	Environmental impact rating	ge are hased on
An average household produces	6 tonnes of CO2	assumptions about average energy use. They may not consumed by the people liv	e occupancy and reflect how energy is

Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from D (56) to C (79).

Step	Typical installation cost	Typical yearly saving
1. Increase loft insulation to 270 mm	£100 - £350	£226
2. Internal or external wall insulation	£4,000 - £14,000	£223
3. Condensing boiler	£2,200 - £3,000	£34

Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

Estimated energy use and potential savings

Estimated yearly energy cost for this property	£910
Potential saving	£482

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The potential saving shows how much money you could save if you <u>complete each</u> recommended step in order.

For advice on how to reduce your energy bills visit <u>Simple Energy Advice</u> (https://www.gov.uk/improve-energy-efficiency).

Heating use in this property

Solid wall insulation

Heating a property usually makes up the majority of energy costs.

Estimated energy used to heat this property

p p y		
Type of heating	Estimated energy used	
Space heating	12204 kWh per year	
Water heating	2099 kWh per year	
Potential energy savings by installing insulation		
Type of insulation	Amount of energy saved	
Loft insulation	4538 kWh per year	

4509 kWh per year

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
