

# Energy performance certificate (EPC)

6, Sheridan Close  
WINCHESTER  
SO22 4EB

Energy rating

**E**

Valid until: **18 July 2029**

Certificate number: **0851-2878-6035-9291-0561**

Property type

Semi-detached house

Total floor area

83 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance) (<https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance>).

## Energy efficiency rating for this property

This property's current energy rating is E. It has the potential to be C.

[See how to improve this property's energy performance.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D  
the average energy score is 60

| Score | Energy rating | Current       | Potential     |
|-------|---------------|---------------|---------------|
| 92+   | <b>A</b>      |               |               |
| 81-91 | <b>B</b>      |               |               |
| 69-80 | <b>C</b>      |               | 79   <b>C</b> |
| 55-68 | <b>D</b>      |               |               |
| 39-54 | <b>E</b>      | 51   <b>E</b> |               |
| 21-38 | <b>F</b>      |               |               |
| 1-20  | <b>G</b>      |               |               |

## Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

| Feature              | Description  | Rating    |
|----------------------|--|-----------|
| Wall                 | Timber frame, as built, partial insulation (assumed) | Average   |
| Roof                 | Pitched, 250 mm loft insulation                      | Good      |
| Window               | Fully double glazed                                  | Average   |
| Main heating         | Electric storage heaters                             | Average   |
| Main heating control | Automatic charge control                             | Average   |
| Hot water            | Electric immersion, off-peak                         | Very poor |
| Lighting             | Low energy lighting in all fixed outlets             | Very good |
| Floor                | Solid, no insulation (assumed)                       | N/A       |
| Secondary heating    | Portable electric heaters (assumed)                  | N/A       |

### Primary energy use

The primary energy use for this property per year is 449 kilowatt hours per square metre (kWh/m<sup>2</sup>).

---

## Environmental impact of this property

This property's current environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year. CO<sub>2</sub> harms the environment.

An average household produces 6 tonnes of CO<sub>2</sub>

This property produces 6.3 tonnes of CO<sub>2</sub>

---

This property's potential production 3.6 tonnes of CO<sub>2</sub>

---

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

---

## Improve this property's energy rating

| Step                                   | Typical installation cost | Typical yearly saving |
|--|---------------------------|-----------------------|
| 1. Floor insulation (solid floor)      | £4,000 - £6,000           | £100                  |
| 2. High heat retention storage heaters | £2,000 - £3,000           | £323                  |
| 3. Solar water heating                 | £4,000 - £6,000           | £67                   |
| 4. Solar photovoltaic panels           | £3,500 - £5,500           | £353                  |

## Paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

## Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

|  |       |
|--|-------|
| Estimated yearly energy cost for this property | £1376 |
|--|-------|

|  |      |
|--|------|
| Potential saving if you complete every step in order | £491 |
|--|------|

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

### Heating use in this property

Heating a property usually makes up the majority of energy costs.

### Estimated energy used to heat this property

| Type of heating | Estimated energy used |
|-----------------|-----------------------|
|-----------------|-----------------------|

|               |                   |
|---------------|-------------------|
| Space heating | 9909 kWh per year |
|---------------|-------------------|

|               |                   |
|---------------|-------------------|
| Water heating | 1936 kWh per year |
|---------------|-------------------|

### Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

### Saving energy in this property

Find ways to save energy in your home by visiting [www.gov.uk/improve-energy-efficiency](https://www.gov.uk/improve-energy-efficiency).

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

### Assessor contact details

|                 |  |
|-----------------|--|
| Assessor's name | Victoria Brinkley  |
| Telephone       | 07827274553  |
| Email           | <a href="mailto:vicky.brinkley@sky.com">vicky.brinkley@sky.com</a> |

### Accreditation scheme contact details

|                      |  |
|----------------------|--|
| Accreditation scheme | Elmhurst Energy Systems Ltd  |
| Assessor ID          | EES/020639   |
| Telephone            | 01455 883 250  |
| Email                | <a href="mailto:enquiries@elmhurstenergy.co.uk">enquiries@elmhurstenergy.co.uk</a> |

### Assessment details

|                        |                       |
|------------------------|-----------------------|
| Assessor's declaration | No related party      |
| Date of assessment     | 18 July 2019          |
| Date of certificate    | 19 July 2019          |
| Type of assessment     | <a href="#">RdSAP</a> |
