Roof:	Average thermal transmittance 0.09 W/m ² ·K
Roof Energy:	Very Good
Main Heating:	Boiler and radiators, mains gas
Main Heating Controls:	Time and temperature zone control
Hot Water System:	From main system
Hot Water Energy Efficiency:	Good
Lighting:	Low energy lighting in all fixed outlets
Floors:	Average thermal transmittance 0.16 W/m ² ·K
Total Floor Area:	141 m ²

This map displays nearby coal mine entrances and their classifications.

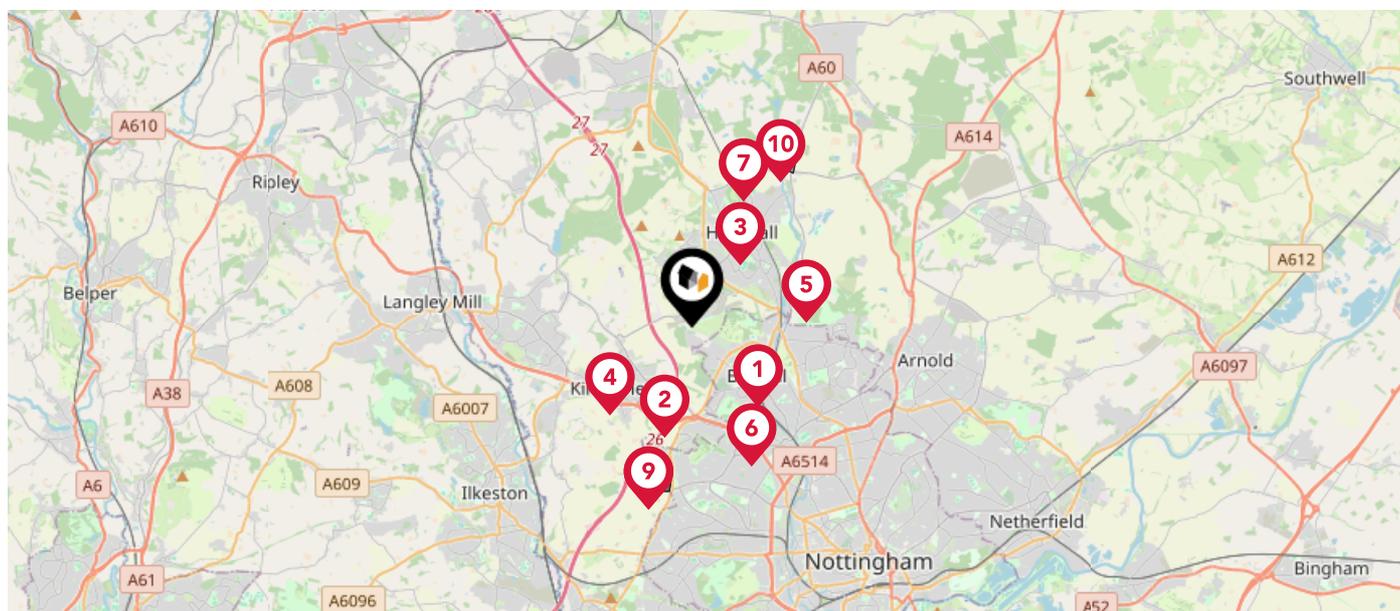

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

Nearby Conservation Areas

Bulwell

-  Nuthall East & Strelley Ward
-  Greasley Ward

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

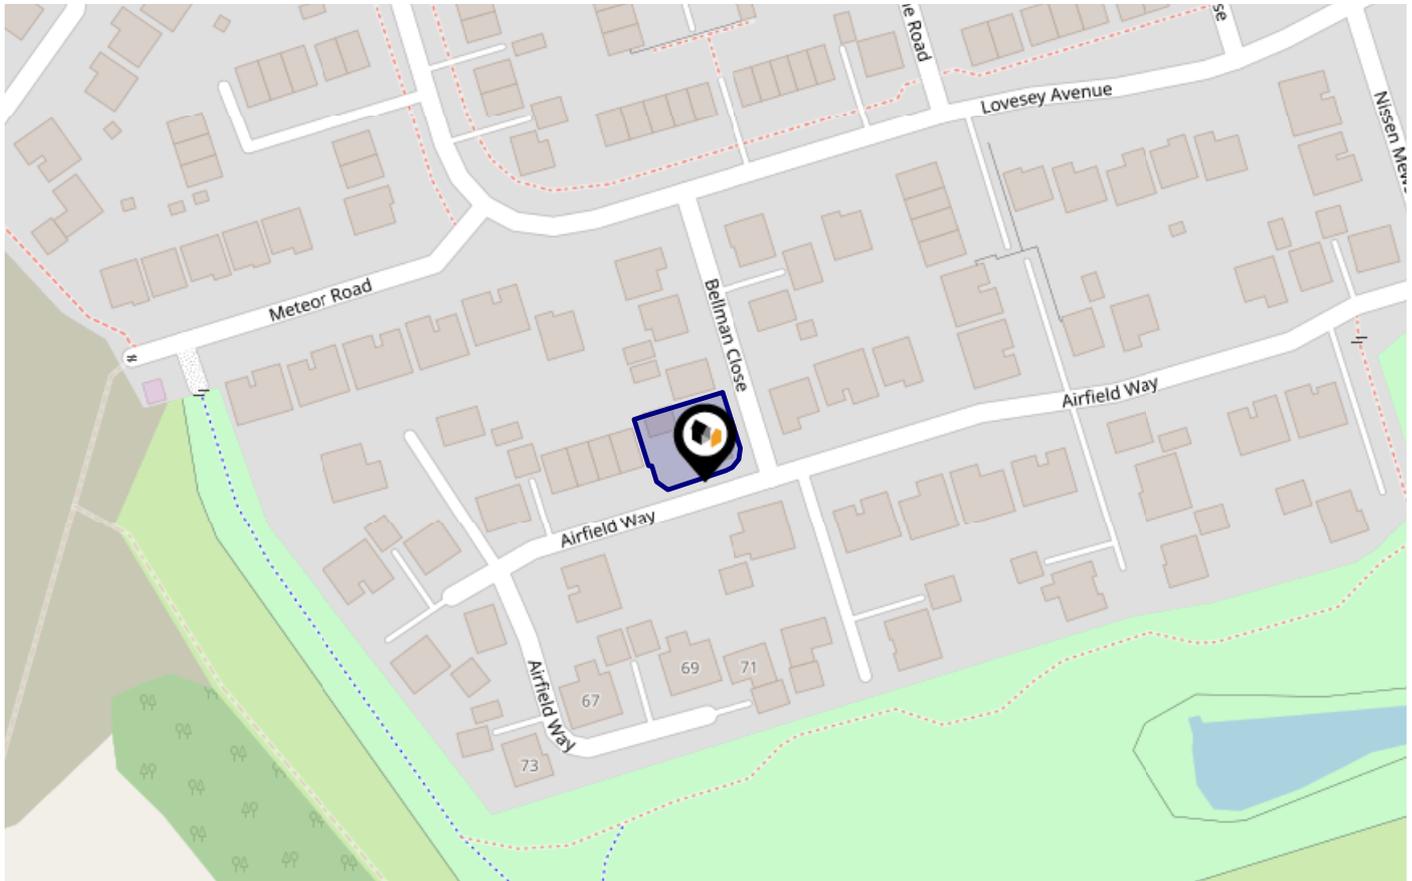

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5		75.0+ dB	■
4		70.0-74.9 dB	■
3		65.0-69.9 dB	■
2		60.0-64.9 dB	■
1		55.0-59.9 dB	■

Flood Risk

Rivers & Seas - Flood Risk

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than **1 in 30 (3.3%)** in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than **1 in 100 (1.0%)** in any one year.
- Low Risk** - an area which has a chance of flooding of greater than **1 in 1000 (0.1%)** in any one year.
- Very Low Risk** - an area in which the risk is below **1 in 1000 (0.1%)** in any one year.

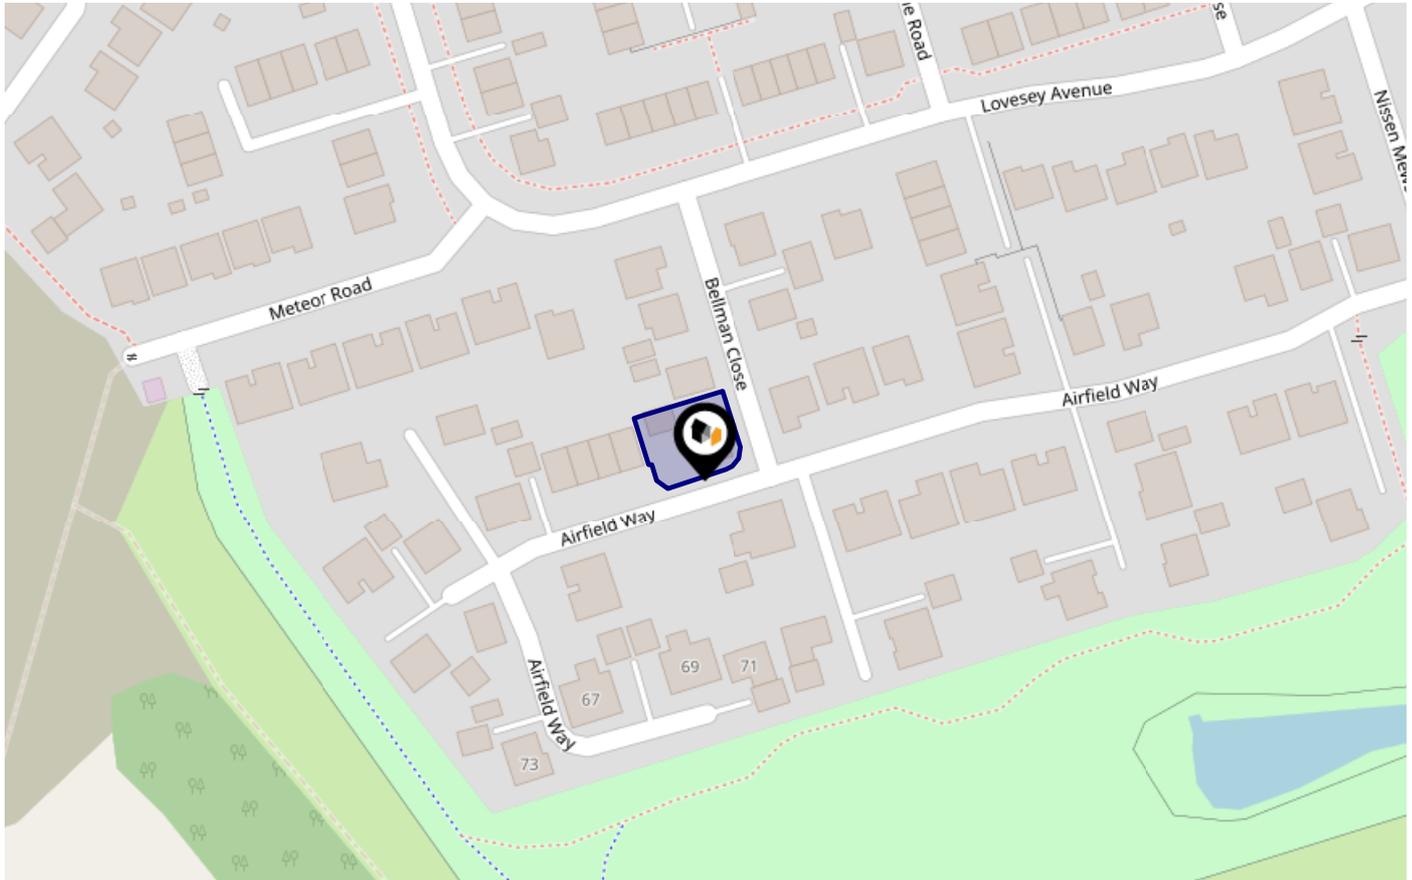

Chance of flooding to the following depths at this property:

Flood Risk

Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.

Local Area

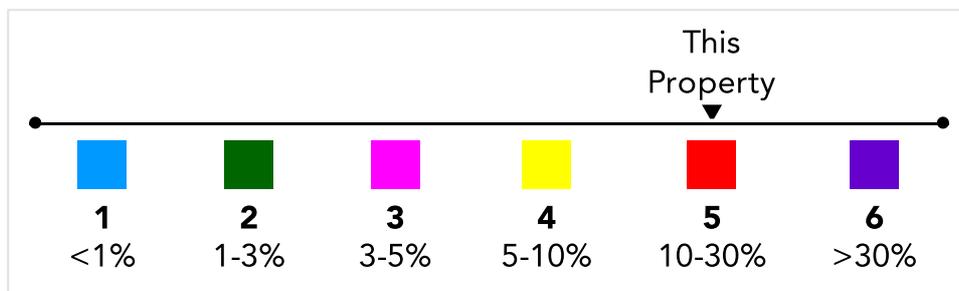

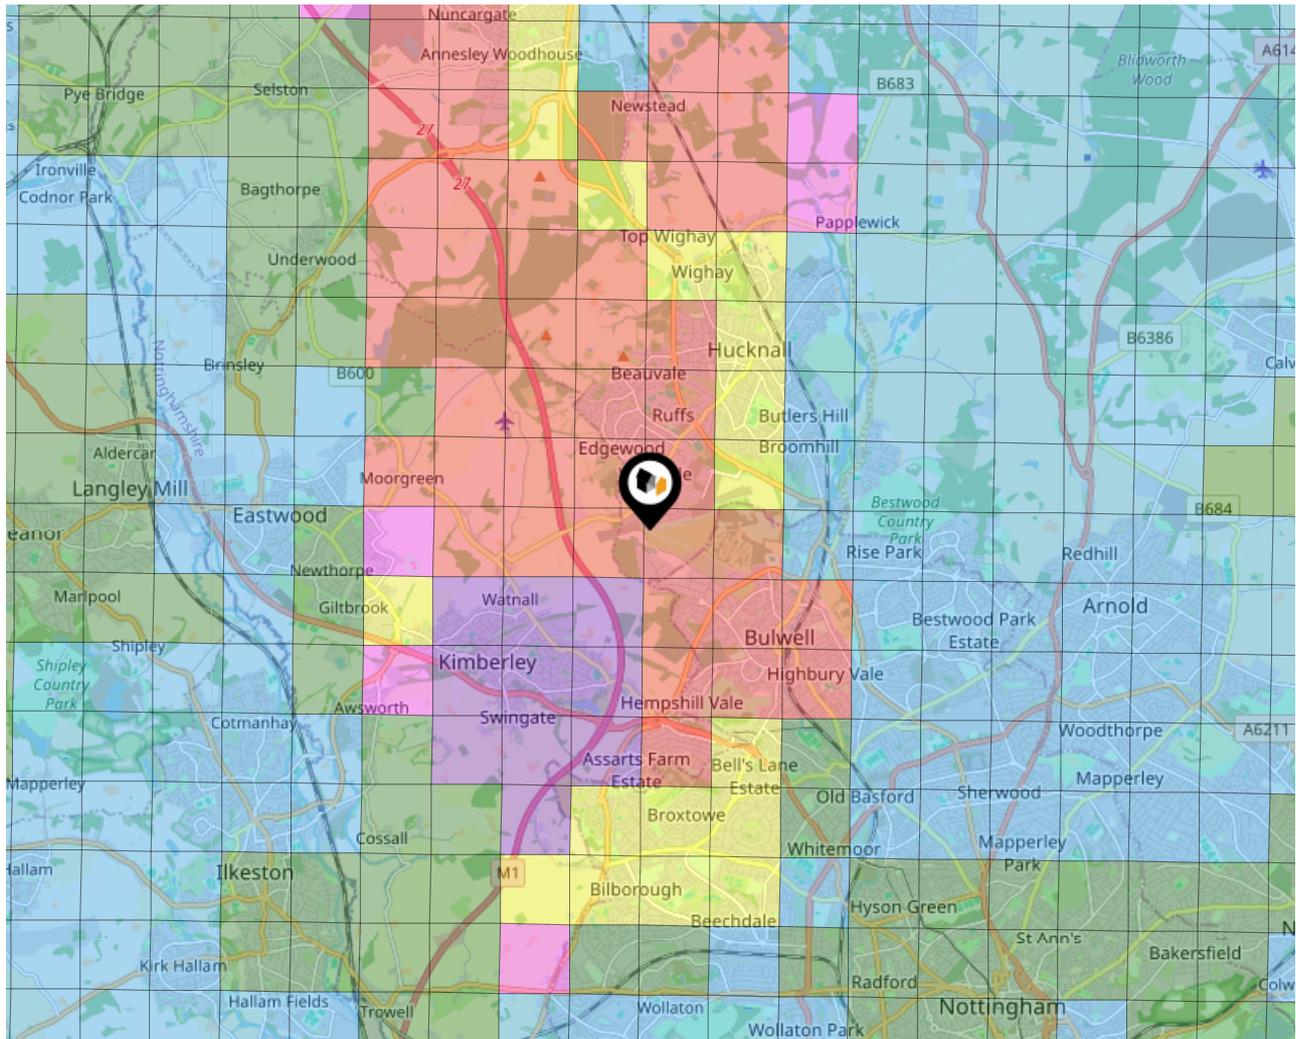

Masts & Pylons

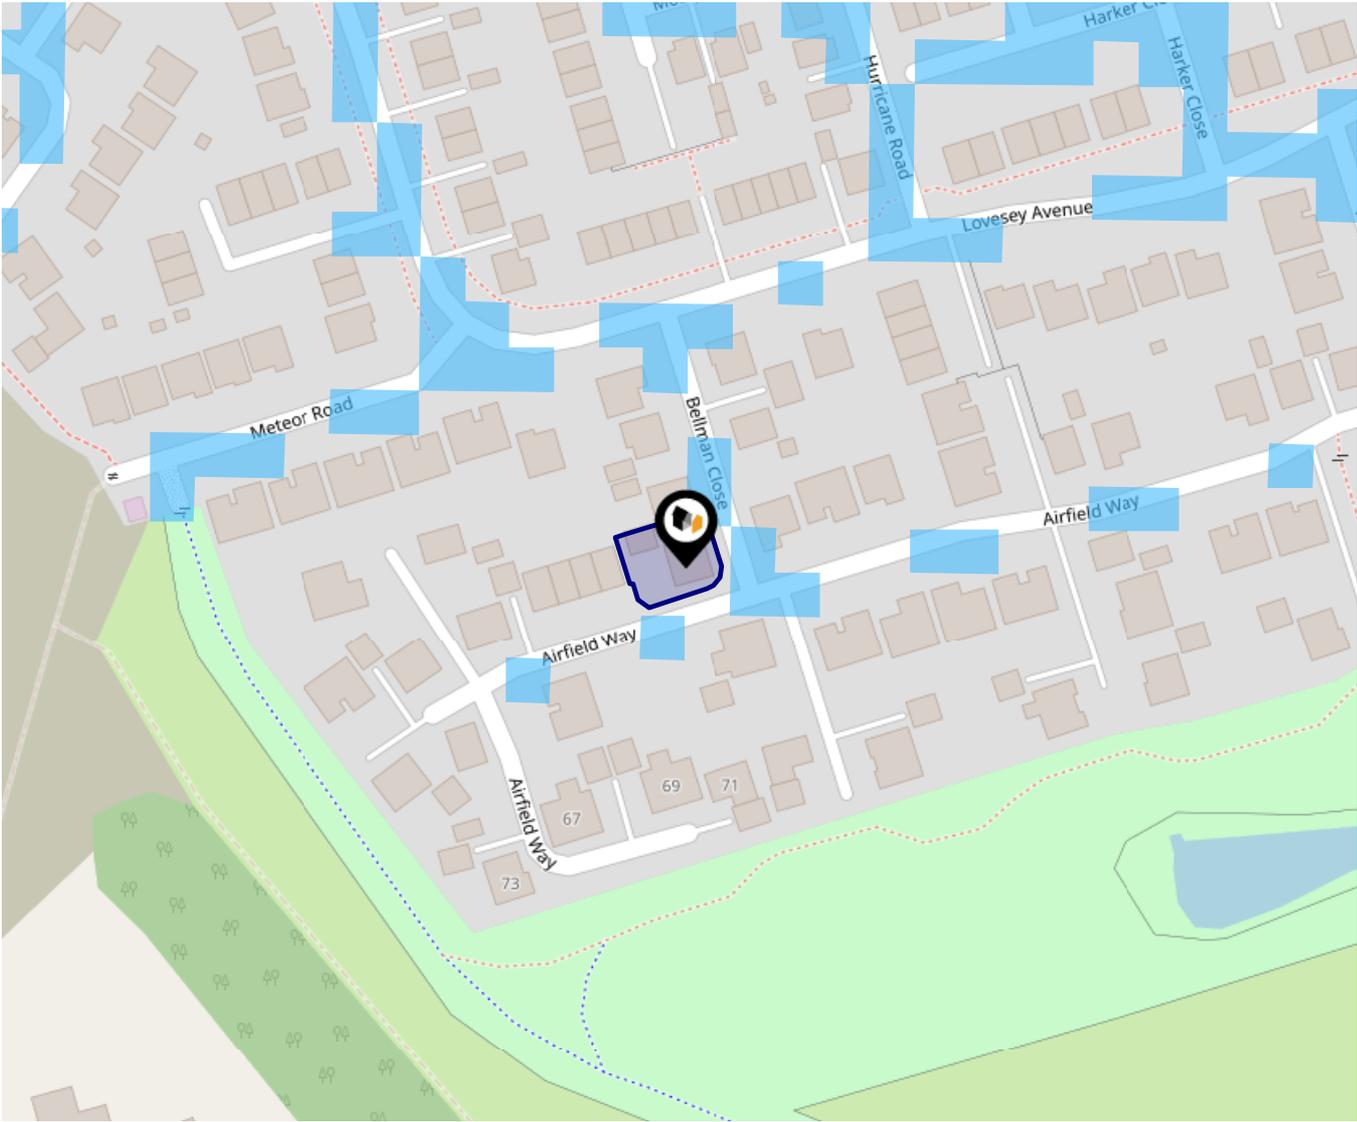

- Key:**
- Power Pylons
 - Communication Masts

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

Local Area Road Noise

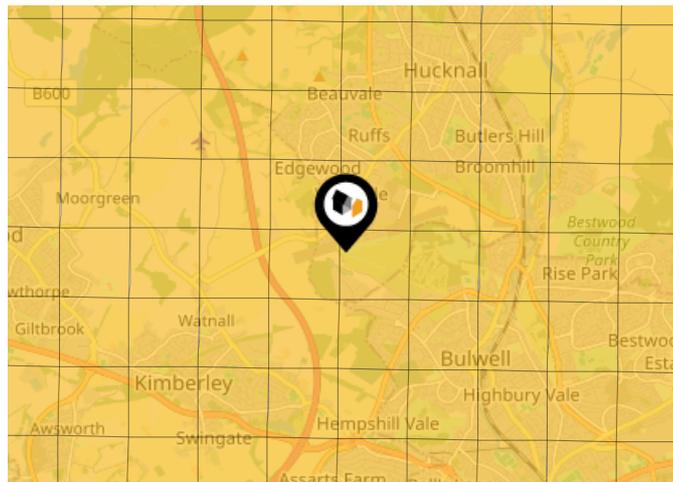

The data indicates the level of noise according to strategic noise sources across all traffic routes. This indicates a 25 house annual average noise level with separate weightings for the evening and the night periods.

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB

Martin & Co - Hucknall

We specialise in residential lettings and house sales across Hucknall, Arnold, Bestwood and the surrounding areas and have been delivering exceptional customer service to local residents, since 2008.

The Martin & Co office is situated on the main high street in the heart of the town centre. Hucknall is a vibrant town with good public transport including a tram and train station, and with good schools it is an ideal location for families.

Testimonial 1

Rosie and the team at Martin and Co, Hucknall provided an excellent service selling my flat, with regular updates and a really efficient sale. Very much appreciated during such uncertain times!

Testimonial 2

Tenant review: Absolutely excellent service from Rosie and Katie at Hucknall Martin & Co. Processed queries quickly with positive customer relations, and treated us with respect by always ensuring we were politely asked before any visits to the premises were conducted (not many agencies actually adhere to this courtesy in practice from our experience!).

Testimonial 3

Katie and Ian are a pleasure to deal with and are extremely professional in their approach. I have complete faith in them and their expertise. I highly recommending their services to anyone for all domestic and commercial requirements for all property services.
