### survey report on:

Property address	425 Strathmartine Road Dundee DD3 9BS
------------------	---

Customer	James Williamson

Customer address	425 Strathmartine Road Dundee DD3 9BS
------------------	---

Prepared by	Shepherd Chartered Surveyors
-------------	------------------------------

Date of inspection	31/03/2025

### PART 1 - GENERAL

### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by marking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

Х

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report<sup>2</sup>.

### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

<sup>&</sup>lt;sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

they assign the same to any other party in writing.

### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;

- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

### **PART 2 - DESCRIPTION OF THE REPORT**

### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments

being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 <u>Category 3:</u> Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 <u>Category 2:</u> Repairs or replacement requiring future attention, but estimates are still advised.
- 3 <u>Category 1:</u> No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

• There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use

communal grounds, parking areas, and other facilities;

- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

### 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Converted main door ground floor flat forming part of a two storey semi-detached sub divided villa.
Accommodation	GROUND FLOOR: Entrance Vestibule, Hallway, Lounge, 3 Bedrooms, Kitchen and Bathroom with WC.

Gross internal floor area (m²)	82 sq metres or thereby.
Neighbourhood and location	The subjects are situated two and a half miles north of Dundee City centre where surrounding properties are generally of a mixed residential nature and there is a bookmakers opposite. Adequate public transport, shopping, social and educational facilities are available within easy reach.

Age	Erected around 1910 and believed to have been converted in
	the 1970s.

Weather	Dry and bright.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	Chimneys would appear to be of solid stone and brick and harled construction with cement and metal flashings.

Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	The roof is of pitched timber construction externally clad in slates incorporating dormer projections of timber weatherboarding design overlaid in what appears to be a sarnafil type membrane (unseen). The roof over the side outshoot is of mono pitched slate design.
	No access was gained to the main roof void over the building as this is via a separate flatted dwelling and there is no apparent provision for access to the void over the side outshoot.

Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	PVC gutters and mixed cast iron and PVC downpipes.

Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main walls are of solid stone construction externally harled to the front and gable and painted at the rear. The side outshoot would appear to be of single brick construction externally harled.

Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	Windows are of aluminium/PVC coated sealed unit double glazed design with front and side doors to match.

External decorations	Visually inspected.	
	Painted finish to eaves and rear elevation.	
Conservatories / porches	None.	
Communal areas	None,.	

# Single Survey Garages and permanent outbuildings Visually inspected. There is an attached store of brick and harled construction with mono pitched slate roof. Other outbuildings comprise a timber shed.

Outside areas and boundaries	Visually inspected.
	To the front is an exclusive area of garden comprising a terraced lawn and chips and at the rear the subject property owns the north half of the site which is laid in lawn. Beyond the rear site is a concrete parking courtyard where the subject property is understood to have two allocated spaces. Vehicular access is off of a shared drive from Duncan Street.
	Boundaries are of stone walls, timber fencing, post and wire fencing and hedging.

Ceilings	Visually inspected from floor level.
	Ceilings would appear to be of lath and plaster and plasterboard construction. Surfaces have been paper and painted.

Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal partitions would appear to be of timber lath and plaster and timber stud and plasterboard. Surfaces have been paper and painted.

Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Floors within the main building are of suspended timber overlaid in tongue and groove boarding and mixed suspended timber and solid concrete in the outshoot.
	Due to fitted floor coverings throughout no inspection was at all possible of the floors and no access hatches were located to the sub-floor area.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal doors are mainly of timber panel design with a glazed door to the vestibule and a flush panel door to the bathroom.
	There are dated base and wall kitchen fitments.

Chimney breasts and fireplaces	None.
Internal decorations	Visually inspected.
	Paper and painted finish throughout.

	Cellars	None.
--	---------	-------

Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Mains supply of electricity serving the subjects with the meter and consumer unit being located within the hall.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Mains supply of gas serving the subjects with the meter being located externally on the front elevation.

Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Mains supply of water and plumbing where seen is of copper, PVC and part lead.
	Sanitary fittings comprise a three piece bathroom suite with shower over the bath.

Heating and hot water	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Gas central heating system fired by an Ideal Logic Combi c30 condensing combination boiler located within the brick store. There are radiators throughout the main apartments which benefit from individually controlled thermostatic valves and central heating piping is of copper construction. Hot water is assumed to be heated directly by the central heating boiler.

Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Assumed to be connected to the main sewer.

Fire, smoke and burglar alarms	Visually inspected.
	No tests whatsoever were carried out to the system or appliances.
	All Scottish homes require a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon- fuelled appliance such as a boiler, open fire or wood burner, a carbon monoxide detector is also required. We have not assessed or tested any existing equipment and it is the purchasers responsibility to confirm that the property will comply with these standards following a change of ownership.

Any additional limits to inspection	For flats / maisonettes
	Only the subject flat and internal communal areas giving access to the flat were inspected.
	If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.
	The property was fully furnished and had fitted floor coverings, therefore no detailed inspection was possible of the floors and accordingly, no comment can be made on their condition. Internal cupboards were generally filled with storage items. No access was available beneath sanitary or kitchen fittings.
	Windows were not all fully opened or tested.
	No access was available to any sub-floor areas.
	No access was gained to the main roof void over the building as this is via a separate flatted dwelling and there is no apparent provision for access to the void over the outshoot.
	No view was possible of the flat roofs over the dormer projections.
	We were not able to fully inspect all areas of boundary walls and fences due to restricted access and garden vegetation.
	An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

### 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1

Structural movement	
Repair category	1
Notes	There was no evidence of significant structural movement within the limitations of our inspection.

Dampness, rot and infestation	
Repair category	2
Notes	Above average damp readings were obtained within the outshoot and sub- floor ventilation is limited at the front of the main building. A precautionary check of the entire property should be carried out by a reputable timber and damp specialist prior to purchase.
	A report has been provided from Hampton Preservation Ltd dated 24 August 2022 which states that in their opinion the dampness in the outshoot has been caused by condensation due to the insubstantial nature of the construction which requires upgrading.
	It is understood that previous wet rot and wood worm treatment works were carried out in 2011 by Hampton Timber Specialists (Dundee) Ltd and a copy of all guarantee documentation should be obtained.

Chimney stacks	
Repair category	2
Notes	Harling is cracked and loose on the gable chimney and there is open jointing to the stone party chimney. Repairs are required.

Roofing including roof space	
Repair category	2
Notes	Chipped, slipped and weathered roof slates were visible. Roof coverings are of an age and style where a degree of regular ongoing maintenance should be anticipated. More extensive overhaul work may be required in the future and prior to purchase further advice should be obtained from a firm of roofing contractors to fully ascertain the condition and life expectancy of the coverings.
	There are flat roofs over the dormers which appear to have been overlaid in a sarnafil type membrane. It should be appreciated that this type of covering can have a limited life span and will require a higher than normal degree of ongoing maintenance.

Rainwater fittings	
Repair category	1
Notes	Within the limitations of our inspection rainwater goods were seen to be free from significant defect.

Main walls	
Repair category	2
Notes	Areas of the harling on the main building are bossed, that is improperly keyed, and future repairs will be required. There is a cracked sill to the front and the rear stone elevation is weathered with flaking paint noted. Mutual repairs will be required. The side outshoot would appear to be of an insubstantial construction type
	being single brick with areas of the harling cracked and missing and spalling brickwork is evident below. Insulation qualities will be limited and this structure will require repair and upgrading. Further advice and estimates should be obtained from a building contractor.

Windows, external doors and joinery	
Repair category	2
Notes	Windows were not all fully opened or tested and it will be appreciated that some defects are only evident during certain weather conditions. The front north most bedroom unit has failed having allowed condensation to form between the panes, there is wear and tear to units and the bathroom window is ill-fitting. Windows an doors are of an older style and repair and ongoing maintenance will be required. Further advice should be obtained from a glazier. External eaves timbers are decayed and these will deteriorate if left unattended.

External decorations	
Repair category	2
Notes	External paintwork on the rear elevation is flaking and the eaves are in need of redecoration.

Conservatories/porches	
Repair category	N/A
Notes	Not applicable.

Communal areas	
Repair category	N/A
Notes	Not applicable.

Garages and permanent outbuildings	
Repair category	2
Notes	The brick store is in fair condition having regard to its age and use and ongoing maintenance should be anticipated. There are traces of wood bore infestation which may have been treated. This should be confirmed.

Outside areas and boundaries	
Repair category	2
Notes	Stone boundaries are weathered with areas of defective pointing and the front boundary is under pressure requiring repairs. Mature vegetation and hedging within the site will require ongoing maintenance by an experienced contractor.
	There is cracking to the concrete courtyard at the rear.

Ceilings	
Repair category	1
Notes	Within the limitations of inspection no significant defects were noted although condensation is affecting the linings within the outshoot.

Internal walls	
Repair category	1
Notes	Within the limitations of inspection no significant defects were noted although condensation is affecting the linings within the outshoot.

Floors including sub-floors	
Repair category	1
Notes	Due to fitted carpets and floor coverings no detailed inspection of floors was possible and accordingly no comment can be made on their condition.

Internal joinery and kitchen fittings	
Repair category	1
Notes	Internal joinery is generally serviceable although wear and tear was noted to be affecting the kitchen fitments and upgrading should be anticipated.
	Low level glazing to the vestibule door and mirrored wardrobes should be checked for safety glass.

Chimney breasts and fireplaces	
Repair category	N/A
Notes	Not applicable.

Internal decorations	
Repair category	1
Notes	The internal decoration will require to be upgraded dependant on individual taste.

Cellars	
Repair category	N/A
Notes	Not applicable.

Electricity	
Repair category	2
Notes	It would appear that some upgrading has been carried out to the wiring system in the past with the installation and a consumer unit which is date stamped 28 March 2022. Aspects of the system however are on semi- modern lines and the system should be checked as a precaution by a registered electrician and upgraded if necessary. The Institution of Engineering Technology recommends that inspections and testings are undertaken at least every five years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	1
Notes	In the interests of safety and in light of recent regulations it would be prudent to have all gas appliances checked by a Gas Safe registered contractor.

Water, plumbing and bathroom fittings				
Repair category	2			
Notes	Lead pipework was noted within the kitchen. A reputable contractor should check the entire system and upgrade as necessary.			
	Sanitary fittings appear serviceable however surround seals, tiling and finishes should be checked and maintained watertight. We were unable to view concealed areas below sanitary fittings and cannot confirm they are free from damp or other defects.			

Heating and hot water				
Repair category	1			
Notes	It has been advised by the vendor that the central heating boiler was installed in late 2023 and a copy of the warranty documentation should be obtained and checked.			
	It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements. Service records should be obtained and checked. Some radiators are of a semi- modern vintage.			

Drainage	
Repair category	1
Notes	All foul and surface water drainage is assumed to be to the main public sewer. The system was not tested.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	2
Roofing including roof space	2

Chimney breasts and fireplaces	N/A
Internal decorations	1
Cellars	N/A
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

### Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

### Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

### Category 1

No immediate action or repair is needed.

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

### 3. Accessibility information

### Guidance notes on accessibility information

### Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Wherea lift is present, the count is based on the number of steps climbed when using the lift.

### Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?		Ground			
2. Are there three steps or fewer to a main entrance door of the property?	Yes	X	No		
3. Is there a lift to the main entrance door of the property?	Yes		No	X	
4. Are all door openings greater than 750mm?	Yes		No	X	
5. Is there a toilet on the same level as the living room and kitchen?	Yes	X	No		
6. Is there a toilet on the same level as a bedroom?	Yes	X	No		
7. Are all rooms on the same level with no internal steps or stairs?	Yes	X	No		
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes	X	No		

### 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

It is believed that the building was converted in the 1970s and accordingly all alterations would be considered as historic.

The subjects form part of a sub-divided villa and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of common repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

There are shared access paths and a shared driveway at the rear off of Duncan Street. Rights of access and maintenance liability should be confirmed.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist's or contractor's advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

### Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £350,000 (THREE HUNDRED AND FIFTY THOUSAND POUNDS)..

This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

### Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £140,000 (ONE HUNDRED AND FORTY THOUSAND POUNDS).

### **General Remarks**

The subjects comprise a converted main door ground floor flat forming part of a two storey semi-detached sub-divided villa situated two and a half miles north of Dundee City centre where surrounding properties are mainly of a mixed residential nature. Adequate public transport, shopping, social and educational facilities are available within easy reach.

At the time of inspection the property was found to be in a condition generally consistent with its age and type of construction but some works of maintenance and repair are required. Elements of the property are aging and likely to require attention.

The subjects form part of a sub-divided villa and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of common repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

There are shared access paths and a shared driveway at the rear off of Duncan Street. Rights of access and maintenance liability should be confirmed.

### **Essential Repairs**

None.

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,143	See your recommendations
Over 3 years you could save*	£1,287	report for more information

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (64)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Top actions you can take to save money and make your home more efficient

73

59

Recommended measures	Indicative cost	Typical savings over 3 years	
1 Internal or external wall insulation	£4,000 - £14,000	£744.00	
2 Floor insulation (suspended floor)	£800 - £1,200	£297.00	
3 Floor insulation (solid floor)	£4,000 - £6,000	£129.00	

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282. THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
	Solid brick, as built, no insulation (assumed)	★★☆☆☆	$\bigstar\bigstar \bigstar \clubsuit$
Roof	(another dwelling above) Pitched, no insulation (assumed)	★☆☆☆☆	<b>★</b> ☆☆☆☆
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)		
Windows	Fully double glazed	★★★☆☆	★★★☆☆
Main heating	Boiler and radiators, mains gas	<b>★★★</b> ☆	★★★☆
Main heating controls	Programmer, TRVs and bypass	★★★☆☆	★★★☆☆
Secondary heating	None	_	
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Low energy lighting in 50% of fixed outlets	<b>★★★★</b> ☆	<b>★★★</b> ☆

### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 55 kg  $CO_2/m^2/yr$ .

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 4.5 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.6 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

### Estimated energy costs for this home

Estimated chergy costs for this home			
	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,345 over 3 years	£2,193 over 3 years	
Hot water	£393 over 3 years	£393 over 3 years	You could
Lighting	£405 over 3 years	£270 over 3 years	save £1,287
	Totals £4,143	£2,856	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement	
		indicative cost	per year	Energy	Environment
1	Internal or external wall insulation	£4,000 - £14,000	£248	C 70	D 68
2	Floor insulation (suspended floor)	£800 - £1,200	£99	C 72	C 71
3	Floor insulation (solid floor)	£4,000 - £6,000	£43	C 73	C 72
4	Low energy lighting for all fixed outlets	£30	£39	C 74	C 73

### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide longlasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

### 2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

### 3 Floor insulation (solid floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulating solid floors can present challenges; insulation laid on top of existing solid floors may impact on existing doors and finishes whilst lifting of a solid floor to insert insulation below will require consideration of the potential effect on both structural stability and damp proofing. It is advised to seek advice from a Chartered Structural Engineer or a registered Architect about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work and may also require a building warrant so it is best to check with your local authority building standards department.

### 4 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting).

### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

#### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	14,205	(1,458)	N/A	(3,862)
Water heating (kWh per year)	2,055			

#### Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

#### About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Assessor membership number: Company name/trading name:	Mr. Paul Taylor EES/012881 J & E Shepherd
Address:	13 Albert Square
	Dundee DD1 1XA
Phone number:	01382 200454
Email address:	dundee@shepherd.co.uk
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

#### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

# Property Questionnaire

Property address	425 Strathmartine Road Dundee DD3 9BS
Seller(s)	James Williamson
Completion date of property questionnaire	28/03/2025

### Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

#### Information to be given to prospective buyer(s)

1.	Length of ownership		
	How long have you owned the property	1?	2 years
2.	Council tax		
	Which Council Tax band is your proper	ty in?	C
3.	Parking		
	What are the arrangements for parking	at your property?	
	(Please tick all that apply)		
	Garage	Νο	
	Allocated parking space	Yes	
	• Driveway	Yes	
	Shared parking	Νο	
	On street	Νο	
	Resident permit	Νο	
	Metered Parking	Νο	
	Other (please specify):		
4.	Conservation area		
	Is your property in a designated Conse special architectural or historical inter which it is desirable to preserve or enh	est, the character or appear	

5.	Listed buildings			
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	No		
6.	Alterations/additions/extensions			
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	No		
	If you have answered yes, please describe below the changes which you have made:			
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?			
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.			
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:			
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	No		
	If you have answered yes, please answer the three questions below:			
	(i) Were the replacements the same shape and type as the ones you replaced?			
	(ii) Did this work involve any changes to the window or door openings?			
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):			
	Please give any guarantees which you received for this work to your solicitor or estate agent.			
7.	Central heating			
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom).	Yes		
	If you have answered yes or partial – what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).			
	Gas			

	i) When was your central heating system or partial central heating system installed?				
	2024				
	(ii) Do you have a maintenan	ce contract for the centra	al heating system?	No	
	If you have answered yes, please give details of the company with which you have a maintenance contract:				
	(iii) When was your maintena (Please provide the month ar		wed?		
8.	Energy Performance Certifica	ate			
	Does your property have an than 10 years old?	Energy Performance Cer	tificate which is less	Yes	
9.	Issues that may have affected your property				
a.	•	Has there been any storm, flood, fire or other structural damage to the property while you have owned it?		No	
	If you have answered yes, is the damage the subject of any outstanding insurance claim?				
b.	Are you aware of the existent		operty?	No	
10.	Services				
a.	Please tick which services are connected to your property and give details of the supplier:				
	Services	Connected	Supplier		
	Gas or liquid petroleum gas	Yes	Eon		
	Water mains or private water supply	Yes	Scottish Water		
	Electricity	Yes	Eon		
	Mains drainage	Yes	Local Authority		

	Cable TV or satellite	Yes	Virgin		
	Broadband	Yes	Virgin		
b.	Is there a septic tank sys	tem at your property?		No	
	If you have answered yes, please answer the two questions below:				
	(i) Do you have appropriate consents for the discharge from your septic tank?				
	(ii) Do you have a mainte	nance contract for you	ur septic tank?		
	If have answered yes, details of the company with which you have a maintenance contract:				
11.	Responsibilities for share	ed or common areas			
а.	Are you aware of any re used jointly, such as the boundary, or garden are	e repair of a shared d	bute to the cost of anything rive, private road,	Don't know	
	If you have answered ye	<u>es</u> , please give details	5:		
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?			Yes	
	If you have answered yes, please give details:		5:		
	Roof I believe				
с.	Has there been any majo during the time you have		t of any part of the roof	No	
d.	Do you have the right to walk over any of your neighbours'property — for example to put out your rubbish bin or to maintain your boundaries?			Yes	
	If you have answered yes, please give details:				
	Path for putting out bins an	nd access.			
е.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?			Yes	
	If you have answered yes, please give details:				
	Path for putting out bins a	and access.			
f.		ight of way is a way o	nt of way across any part of over which the public has a stely-owned )	No	

	If you have answered yes, please give details:	
12.	Charges associated with the property	
a.	Is there a factor or property manager for your property?	No
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	
b.	Is there a common buildings insurance policy?	No
	If you have answered yes, is the cost of the insurance included in monthly/annual factor's charges?	
C.	Please give details of any other charges you have to pay on a regular baupkeep of common areas or repair works, for example to a residents' as or maintenance or stair fund.	
13.	Specialist work	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	No
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.	
b.	As far as you are aware, has any preventative work for dry rot,wet rot, or damp ever been carried out to your property?	No
	If you have answered yes, please give details:	
C.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?	
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself <u>please write below who</u> <u>has these documents</u> and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the	
	work carried out. This may be shown in the original estimate.	
	Guarantees are held by:	
14.	Guarantees	
a.	Are there any guarantees or warranties for any of the following?	

	(i) Electrical work	Don't know		
	(ii) Roofing	Don't know		
	(iii) Central heating	Don't know		
	(iv) National House Building Council (NHBC)	Don't know		
	(v) Damp course	Don't know		
	(vi) Any other work installations? (for example, cavity wall installation, underpinning, indemnity policy)	Don't know		
b.	If you have answered 'yes' or 'with title deeds', please give details of the installations to which the guarantee(s) relate(s):	e work or		
C.	Are there any outstanding claims under any of the guarantees listed above? <u>If you have answered yes</u> , please give details:	No		
15.	Boundaries			
	So far as you are aware, has any boundary of your property been moved in thelast 10 years?	No		
	If you have answered yes, please give details:			
16.	Notices that affect your property			
	In the past three years have you ever received a notice:			
a.	advising that the owner of a neighbouring property has made a planning application?	No		
b.	that affects your property in some other way?	No		
C.	that requires you to do any maintenance, repairs or improvements to your property?	No		
	If you have answered yes to any of a-c above, please give the notices to yo or estate agent, including any notices which arrive at any time before the d of the purchaser of your property.			

Declaration by the seller(s)/or other authorised body or person(s)
