Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

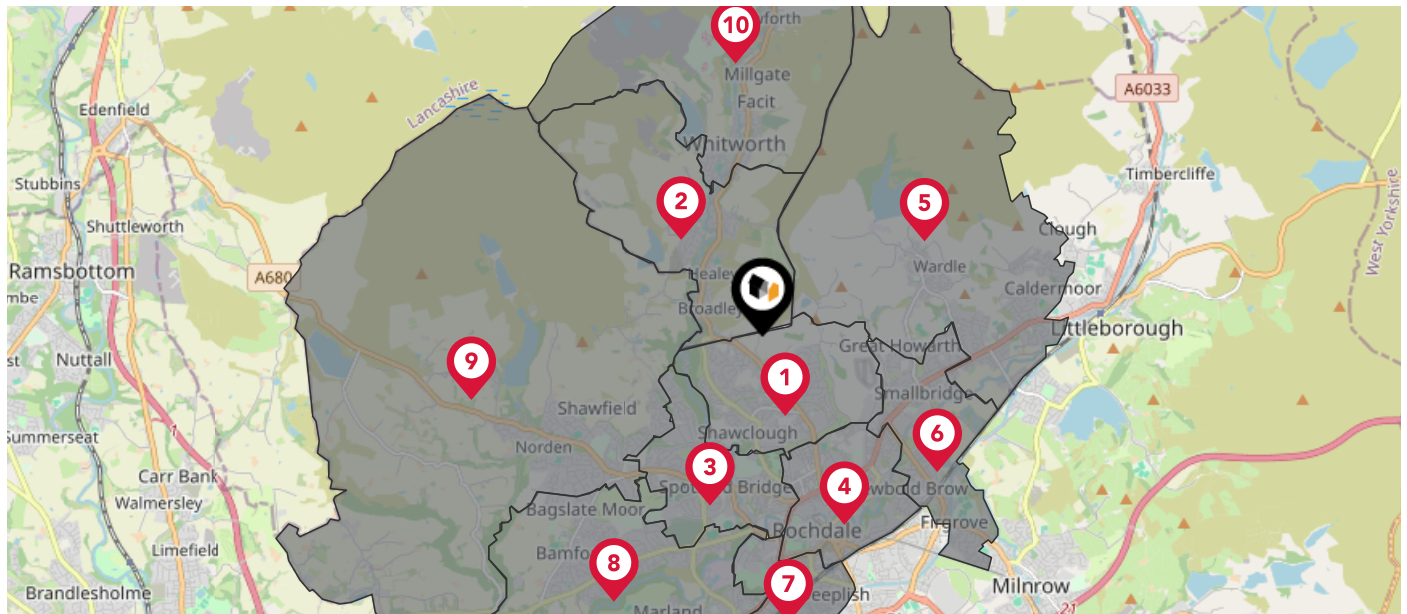

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5		75.0+ dB	
4		70.0-74.9 dB	
3		65.0-69.9 dB	
2		60.0-64.9 dB	
1		55.0-59.9 dB

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

The data indicates the level of noise according to strategic noise sources across all traffic routes. This indicates a 25 house annual average noise level with separate weightings for the evening and the night periods.

Testimonial 1

Thank you to Abby and her team for all their hard work in securing a sale for us . Abby is caring & conscientious which certainly showed in her determination to sell the property.

Testimonial 2

I had a fantastic experience with Martin & Co. The team is incredibly friendly and responsive, quickly addressing both calls and emails. A special mention to Lisa, who was exceptional during the property viewing. She didn't just show me the property but took the time to highlight its best features with such a kind and gentle approach. It was a great experience overall, and I would highly recommend Martin & Co to anyone!

Testimonial 3

Great experience with Abby from Martin & Co Rochdale dealing with a stressful sale and purchase of new property. She was always available to help and chase things up to try and achieve completion on time. If not would call back immediately. Went above and beyond...Would definitely recommend using them!

Testimonial 4

Thank you to Martin and Co for helping us to sell our home. After we lost our buyer and we're feeling deflated, Abby secured a new buyer within a short period of time allowing us to continue with our purchase.
